# ezBCM

is an online software application (SaaS) that allows businesses to seamlessly implement, manage and maintain their Business Continuity (BC) program and documentations. The application is developed based on the inputs from BC professionals globally, best practices in the industry and ISO22301 standards, covering the key activities from impact analysis, strategy development to exercise management and maintenance.

## FEATURES

- ◆ Compliant to ISO22301 BCMS standard and BCM best practices.
- ◆ Supports the entire BCM development processes associated with review, maintenance, approval and publication of organisation's BCM policy requirements.
- ◆ Expandable. Supports unlimited BCMS documentation and plans with pre-populated templates.
- ◆ Incident management module that enable you to manage crisis and make key decisions confidently and quickly.
- ◆ Enable uploading of documents to be linked or embedded into the plans.
- ◆ Supports different levels of users, depending on their roles.
- ◆ Interfaces with third party mass notification tools.
- ◆ Automated task reminders, including scheduled review and compliance process reminders.
- ◆ Requires no installation on client PC.
- ◆ Works with all internet browsers.

## BENEFITS OF USING ezBCM

- ◆ Simple and easy to use for all levels of users.
- ◆ Ownership of the program through empowerment of key stakeholders.
- ◆ Easily access the program through web portal or mobile portal, during peace or crisis time.
- ◆ Allows for central monitoring and managed by organisation BC Manager.
- ◆ Automated populate changes in data from one module to another. No more version control issues.
- ◆ Regular upgrades and updates to meet industry standards and changes. No more monitoring of upgrades required.

## WHAT OUR CLIENTS SAY:

I can't imagine just how difficult it might be to manage and track the progress of BIA and BCP of 25 departments within my organisation without the use of such well-thought-out software like ezBCM. Creating BC Plans from BIA is a breeze in just a few clicks. With ezBCM, it has significantly lessened my workload.

**Danny,**  
BCM Manager in healthcare industry

ezBCM was introduced to us when we embarked on the business continuity journey since July 2016. While different business units may deploy unique ways to manage their respective business processes during a disruption, ezBCM serves as the epicentre where all information resides. This proves to be a leveraged move for me as the program manager, the ease of getting information at a designated platform means save time and reduced hassle of checking with individual department coordinators.
