If you are ISO22301 certified or are maintaining a BCM programme in your organisation, conducting annual exercises is a must and could be a painful experience if you have a lot of people to test in multiple locations.

ezSimulation is a product that we have created

specially to solve your BCM simulation exercise woes. It is simple to use, engaging and can be rolled-out quickly to hundreds and thousands of users via the internet.

Even if you are planning only to conduct desktop exercises, use ezSimulation to turn your desktop exercises into an instant hit with your participants. Meet the next industry standard in exercise automation.

Don't take our words for it. Try out our demo yourself at **www.ezSimulation.com** today. You will be pleasantly surprised.

THE NEXT INDUSTRY STANDARD IN EXERCISE AUTOMATION

Customisable Scenarios
Create interesting and engaging BCM Exercises that suit your organisation.

Fast & Effortless Distribution
Roll out your exercise to all participants via the Internet.

Instant Report & Data Compilation
Get a comprehensive report on your participants' responses.

Access Anytime Anywhere
Participate in the exercises using any mobile devices or PC.
